Education

B.Sc. Computer Science — Effat University
Expected Graduation: 2027 | GPA: 3.83 / 4.00

Relevant Interests:

- Machine Learning
- Data Science
- Healthcare AI

Projects

ICU Mortality Prediction System

- Developed ML models for ICU mortality prediction
- Used Pandas, Scikit-learn, XGBoost
- Applied feature engineering and model evaluation

EpiLoad Framework

- AI-driven healthcare load management framework
- Focused on epidemic surge coordination and prediction

Technical Skills

Programming:
Python, Java, SQL, JavaScript

Machine Learning:
Pandas, Scikit-learn, NumPy, XGBoost

Web:
HTML, CSS, JavaScript

Tools:
GitHub, VS Code, Google Colab

Activities / Leadership (optional)

- Machine Learning coursework projects
- Team-based healthcare AI research work
